About the composer and his song

Teddy Kalanda Harrison (b. 1951) is an internationally known Kenyan musician. In 1972 he founded the music group Them Mushrooms and went on to record more than fifteen albums in their Nairobi studio. He is the owner of Big Matata Productions, a record company dedicated to raising money for the charity Oxfam America, an international relief and development organization that creates lasting solutions to poverty, hunger, and injustice.

Jambo, originally known as *Kenya Hakuna Matata* and *Jambo Bwana*, was composed in 1980 and first recorded by Them Mushrooms. The recording sold over 200,000 copies between 1982 and 1987, receiving the platinum certification in Kenya. Additional renditions followed with recordings produced in Sudan, Ethiopia, Dubai, Germany, France, Holland, Belgium, Canada, Spain, Portugal, Italy, and Switzerland. In 1994 Elton John composed a song to be used in The Lion King using the title *Hakuna Matata*—other than borrowing the title, it bears no relationship to the Harrison composition.

Performance notes

This arrangement offers the opportunity, after the notes are learned, to move to a different key—one that best showcases the strengths of the ensemble.

The written Djembe percussion parts are to be used simply as a guide. Percussionists may be encouraged to get creative and use various African percussion instruments to enhance the overall style and interpretation of the piece. Appropriate instruments include various types and sizes of drums: Djembe, Conga, Dunun, Bugarabu, Ngoma, and gourd drums. African bells, rattles, and shakers may also be used.

Whatever the choice of instrumentation, it should not be allowed to cover the voices; rather, it should tastefully provide its rhythmic impact as an underlay to the singers. As in African musical tradition, percussion fills are appropriate during times when the voices are resting.
